SITE PLAN REVIEW FEE SCHEDULE

Application Fee:	\$100.00
Each 1,000 including any increments thereof:	\$10.00
For each page of Mylar, if required by the Planning Board:	\$26.00

Fire Department, Zoning Compliance Review, Multi-tenant, Home Occupation or Sign Permit. The above may require an additional fee, please refer to the Selectman's Office for Guidance.

Applications will be billed at current cost for publication of legal notice in local Newspaper and certified mail to each abutter.

The Board may require special investigative studies, environmental assessments, a legal review of documents, administrative expenses, engineering studies, and other matters it requires, in its judgment, to make an informed decision. The cost of such studies and investigations shall be paid by the applicant prior to the approval or disapproval of the final plan. Failure to pay such costs shall be sufficient cause for disapproval of the application.

SITE PLAN REVIEW REGULATIONS

Richmond, New Hampshire

- I. Authority:** Pursuant to the authority vested in the Town of Richmond Planning Board, voted on at the March 1972 Town Meeting in accordance with the provisions of Chapter 674: Sec. 43, New Hampshire Revised Statutes Annotated, 1984 as amended, the Town of Richmond Planning Board adopts the following regulations governing the review of non-residential site plans and multi-family development in excess of two (2) units, whether or not such development includes a subdivision or re-subdivision of the site. These regulations shall be entitled “Site Plan Review Regulations, Town of Richmond, New Hampshire”.
- II. Purpose:** The purpose of the Site Review Procedure is to protect the public health, safety, and welfare; to promote balanced growth; to prevent premature and uncoordinated development of land without adequate provision of public services and facilities; to ensure sound site utilization; to avoid development which may result in negative environmental impacts; and to guide the character of development.
- III. Procedures:**
- A.** Site Plan Review shall be conducted in accordance with the procedural requirements contained in Subdivision Regulations Article 4 for review of final plats including notice to abutters and a public hearing.
 - B.** The cost of notifying abutters will be borne by the developer.
 - C.** If the site plan meets the evaluation criteria and is approved by the Planning Board, then the applicant may apply for a building permit.
 - D.** No building permit will be issued until approval of the site plan by the Richmond Planning Board is granted.
 - E.** The applicant will be notified by certified mail of approval or disapproval of site plan.
 - F.** The applicant will file the application with the board or it’s agent at least 14 days but up to 21 days prior to the meeting at which the application will be accepted.
- IV. Submission Requirements:**
- A.** Application for Site Plan Review properly filled out.
 - B.** Site Plan:
 - 1.** Sheet size: 22” x 34” maximum.
 - 2.** Scale: not less than 1” = 60’.
 - 3.** Match lines when needed.
 - 4.** Original on mylar in permanent ink; (Due at time of signing by the Board)
 - 5.** Four (4) prints of each plan sheet (blue or back line).
 - 6.** Date, title, scale, north arrow, location map.
 - 7.** Name & address of developer, designer/engineer, owner of record and contact person.
 - 8.** Topographical plan with contour lines at two (2) foot intervals and at spot elevations. Benchmark from USGS datum.
 - 9.** All easements shall be shown and identified. (Size, location and type)

- 10. Stamped and signed by a licensed NH Land Surveyor.
- 11. A written description of proposed use; including projected number of employees and /or inhabitants and the projected traffic flow.

- C. List of current names and addresses of all abutters within 200 feet of the property line, including those across any street, road, or highway;
- D. Abutters' notification fee (Certified mail payable to Postmaster) at current postal fees.

V. Required Exhibits and Data:

The following items are required on the site plan(s):

- A. Plan of site showing existing natural features including water courses and water bodies, trees, other vegetation, topographical features, and any other features which should be considered in the site design process;
- B. Plans showing all buildings with their type, size, location (set backs) and elevation of first floor indicated;
- C. An elevation view of all buildings indicating their height, width, length and exterior surface treatment;
- D. Location of off-street parking and loading spaces with a layout of the parking indicated;
- E. The location, width, curbing and type of access and egress, plus any streets within and around the proposed site;
- F. The size and location of the proposed water supply and sewage facilities and provision for future expansion of sewage and water facilities if needed, and all distances from existing water and sewage facilities on the site and on abutting properties to a distance of 200 feet;
- G. The type and location of solid waste disposal facilities. All containers must be placed on a concrete slab and screened from view;
- H. The location, elevation and layout of catch basins and other surface drainage features;
- I. Existing and proposed contours and finished grade elevations - - all contours shall be a minimum of 2-foot intervals in areas to be developed;
- J. The type, extent and location of existing and proposed landscaping and open space areas indicating what existing landscaping and open space areas will be retained;
- K. The location, size and design of all proposed signs and other advertising or instructional devices;

- L. The size and location of all public service connections;
 - M. The location and type of lighting for all outdoor facilities. Lighting shall be installed and arranged so as not to reflect or cause glare upon abutting land or highways, shining upwards or toward the sky. Fixtures and locations must be approved by the Planning Board.
 - N. Rights of ways of all existing adjoining streets.
 - O. Surveyed property lines showing their deflection angles, distances, radius, lengths of arcs, central angles, along all property lines and monument locations.
 - P. Names of all abutters within 200 ft.
 - Q. If a subdivision (all Subdivision Regulations shall apply), then lines and names of all proposed streets, lanes, ways, or easements intended to be dedicated for public use.
 - R. Appropriate buffers per **VII** of this regulation.
 - S. Screening must be provided to reduce visual pollution per **VIII** of this regulation.
 - T. Erosion and Sedimentation Plan per **X** of this regulation.
 - U. Flood Hazard Areas per **XIV** of this regulation.
 - V. Any other exhibits or data that the Planning Board may require in order to adequately evaluate the proposed development for Site Review.
 - W. All blasting must follow the Best Management Practices located in the most up to date Richmond Blasting and Heavy Construction Activities Regulations.
- VI. General Standards:** Design of development should fit the existing natural and man-made environments with the least stress:
- A. Site preparation is to be conducted with minimal disturbance to existing vegetation. Stripped topsoil is to be piled and reused on the site where needed. A minimum of 4 inches of topsoil is to be placed on the disturbed area. The site shall be adequately landscaped.
 - B. Landscape treatment shall consist of natural, undisturbed vegetation or features, or ground cover, shrubs, or trees as appropriate.
 - C. Grading and filling must be conducted to minimize the alteration of surface and subsurface drainage to, toward or across abutting properties, unless the written consent of the abutting owner is obtained.
- VII.** Appropriate buffers are to be maintained or installed to provide privacy and noise reduction to residential areas abutting non-residential sites:

- A.** Buffer strips must be maintained between use and residential zones. Buffer strip between non-residential and residential zone must contain vegetation which will screen non-residential uses of site from residential area during winter months. Size of buffer strip to be determined by the Richmond Planning Board based on proposed use and current use of surrounding area.
- B.** A landscaping plan must be submitted showing locations and types of vegetation to be retained or established.

VIII. Screening must be provided to reduce visual pollution:

- A.** Storage areas must be fenced or screened from on-site or adjoining parking and neighboring properties.
- B.** Litter (garbage) collection areas must be screened.
- C.** The use of either fencing or hedges is permitted.

IX. Parking, Loading and Pedestrian Safety:

- A.** Sufficient off-street parking must be provided for the anticipated use to accommodate both employees and customers so that no parking is forced onto public streets.
- B.** Sufficient off-street loading and/or unloading space must be provided, including off-street area or maneuvering of anticipated trucks or other vehicles. Maneuvers for parking and/or loading or unloading must not take place from a public street.
 - 1.** Shelter for children at bus stops may be required if deemed necessary by the Planning Board.
- C.** Access, parking and loading areas are to be constructed so as to minimize dust, erosion, and run-off conditions that would have a detrimental effect on abutting or neighboring properties.
 - 1.** Permeable pavement may be used to reduce the need for installation of drainage facilities to accommodate run-off. however,
 - 2.** The Board may require that access, parking, and loading areas be conventionally paved if appropriate or necessary.

X. Erosion and Sedimentation Plan shall:

- A.** Make provision to accommodate the increased run-off caused by changed soil and surface conditions during and after development. Sediment in the run-off water shall be trapped by the use of sediment basins or other acceptable methods until the disturbed area is stabilized. Diversions, sediment retention basins, and other such devices, shall be constructed prior to any on-site grading or disturbance of existing surface material.
- B.** Show control measures both during construction and any permanent controls to remain after construction.
- C.** Identify, locate, and show elevation, grades and/or contours at intervals of not more than two (2) feet for the existing and proposed drainage ways, drainage easements, drainage structures, and water bodies.
- D.** Identify and show location of proposed erosion and sediment control measures and structures during and after development.

- E.** Include drawings and specifications for each proposed soil erosion and sediment control measure and structure in accordance with the town and the Cheshire County Conservation District standards.
- F.** Include drawings, details and specifications for proposed flood hazard prevention measures and structures and for proposed storm water retention basins.
- G.** Ensure that stripping of vegetation, re-grading or other development will be done in such a way that will minimize soil erosion. Temporary seeding and/or mulching may be required by the Board to protect exposed critical areas during development. Whenever practical, natural vegetation shall be retained, protected and supplemented.

XI. Illumination:

- A.** Outdoor lighting shall not glare on abutting properties or on public highways or streets.
- B.** Indirect lighting should be used on signs advertising goods or services offered on the premises. Moving, fluttering, blinking, or flashing lights or signs are not permitted.
- C.** Outdoor lighting is restricted to that which is necessary for advertising and security of the development.

XII. Access to public streets will meet the requirements of the New Hampshire Department of Public Works and Highways and/or the Richmond Road Agent, if adopted and shall be suitable to the use of the proposed access.

XIII. Water supply and sewage disposal systems must be sized to adequately meet the Maximum site capacity of the proposed use under the regulations of the New Hampshire Water Supply and Pollution Control Commission and/or the Town of Richmond Subdivision Regulations. In areas not currently served by public sewers, it shall be the responsibility of the developer or his agent to provide adequate information to prove that the area of the lot is adequate to permit the installation and operation of an individual sewerage disposal system (septic tank and field). State approval must be obtained before site plan approval can be given.

XIV. Flood Hazard Areas:

- A.** Site plans, for both non-residential development and multi-family units other than one- and two-family dwellings, will be reviewed to determine whether such proposals will be reasonably safe from flooding. If such a proposal is determined to be in a flood prone area, such proposals will be reviewed to assure that:
 - 1. All such proposals are consistent with the need to minimize flood damage within the flood prone area.
 - 2. All public utilities and facilities, such as sewer, gas, electrical, and water systems are located and constructed to minimize or eliminate flood damage.

3. Septic systems, if required, shall be designed to minimize or eliminate infiltration of floodwaters into the systems and discharges from the systems into flood waters.
4. The lowest floor (including the basement) is elevated or flood-proofed to or above the base flood level.

B. National Flood Insurance Requirements:

For Site Plans that involve land designated a “Special Flood Hazard Areas” (SFHA) by the National Flood Insurance Program (NFIP)

1. The Planning Board shall review the proposed development to assure that all necessary permits have been received from those governmental agencies from which approval is required by Federal or State law, including Section 404 of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C.1334.
2. The Planning Board shall require that all proposals for development greater than 50 lots or 5 acres, whichever is the lesser, include Base Flood Elevation (BFE) data within such proposals (i.e. floodplain boundary and 100-year flood elevation).

The Planning Board Shall require the applicant to submit sufficient evidence (Construction drawings, grading and land treatment plans) so as to allow a determination that:

- all such proposals are consistent with the need to minimize flood damage:
- all public utilities and facilities, such as sewer, gas, electrical and water systems are located and constructed to minimize or eliminate flood damage:
- and,
- adequate drainage is provided so as to reduce exposure to flood hazards.

- XV.** A registered engineer hired by the town, shall inspect all site planned improvements. The developer shall pay the cost of the Board’s employment of said engineer and the cost of any inspection(s) and test(s) deemed necessary by the Board or by the engineer. Periodic inspections may be required during construction by a registered engineer. A letter, certifying to the developer’s concurrence to the employment of said engineer, shall be filed with the Board as part of the site plan review. Engineer is defined as the duly designated engineer of the town of Richmond, or other official, assigned by the Planning Board, who shall be a duly registered engineer.
- XVI.** The Planning Board may waive any requirements listed in the Site Plan Review Regulations, if it determines that such regulations do not apply to the proposed development. Waivers must be written and requested for each item believed to not pertain to the application.
- XVII.** The Planning Board may require that a performance bond, the amount to be approved by the Planning Board by expert advice at the cost of the applicant, in the form of a passbook savings deposit, letter of credit or a bond, be posted by the developer and held by the town until the town is satisfied that all conditions of the site plan approval and any other pertinent zoning

ordinance(s), subdivision regulation(s) and building regulation(s) have been met. The purposes of the bond are to guarantee reclamation of the area, compliance with the permit, and any inspections. Off-site improvements for potential damage of Town roads or facilities caused by the transportation of earth materials shall be discussed at this stage. The bond may be released in part when the project is substantially completed

VI. Restrictions Regarding Proposed Industrial Usage:

- A. No dwelling, industrial structure or other building shall exceed height specification for a dwelling as listed in the Richmond Zoning Ordinance without a variance from Zoning Article 3:309.
- B. Any proposed industry, either using and/or producing toxic substances or waste materials, shall be required to show E.P.A. approval on proposed waste, storage, handling and disposal.

VII. "As-built" Plan Minimum Requirements:

- A. The Plan shall be the same scale and sheet size as the plans used in the application.
- B. One Mylar/clear film and one paper copy of each sheet of the "as-built" plan stamped by a New Hampshire Licensed Land Surveyor and a Civil Engineer licensed in New Hampshire. The engineer will certify to the adequacy and conformance of the finished site as shown on the "as-built" plan. The Land surveyor shall certify to the accuracy of the location of the features shown on the "As-built" plan. Planning Board Signature box is needed providing a sufficient area for both the Chairman of the Planning Board and Secretary of the Planning Board to sign the plan.
- C. The plan shall show all improvements, structures, and topography of the site with sufficient information for the board to check the existing conditions versus the approved proposed plan. Such as but not limited to: drainpipe sizes and slopes, storm water retention/treatment areas, finished grading of slopes, parking areas, and roadways, building locations, sanitary sewer, underground and above ground utilities, vegetative buffers and berms, and wetland mitigation or disturbed areas.

Any requirements of this "As-built" may be waived at the discretion of the Planning Board. A waiver request for each item shall be submitted by the applicant.

In recognition of timing, weather, or other factors affecting construction the Planning Board may allow occupancy or use permit of a portion of the site. An "As-built" of that portion of the site for which a permit is being sought shall be required unless waived by the Planning Board.

Any significant changes to the approved site plan shall require approval by the Town engineer or the Planning Board.

Appendix 4

TOWN OF RICHMOND
PLANNING BOARD
AGREEMENT TO COMPLETE SUBDIVISION IMPROVEMENTS

Whereas _____ of _____ (hereinafter called the subdivider) has applied to the Planning Board of the **TOWN OF RICHMOND** (hereinafter called the Board) for approval of a certain plan for the subdivision of land in the Town of Richmond, which plan is shown on a map entitled “ _____ ” dated _____ and prepared by _____ :
and

Whereas the Board has approved said plan on condition that the subdivider file with the board a bond with surety, satisfactory to the Board, in the amount of _____ dollars, securing to the Town the actual completion within one year from date hereof, or such longer periods as the Board may approve in writing of certain work and installations required by the Board, as more fully appears from the files of the Board relating to the Subdivider’s application for approval of the subdivision, and

Whereas the Subdivider is required to offer for acceptance by the Town all streets lying within said subdivision:

NOW THEREFORE, the subdivider and the Board agree as follows:

1. The subdivider hereby agrees to complete within one year from the date hereof, or such longer periods as the board may approve in writing, certain work and installations required by the Board as more fully appears from the files of the Board relating to the Subdividers application for approval of the aforesaid subdivision (which files are hereby incorporated therein by reference and made a part hereof) all in accordance with the subdivision regulations and road construction regulations of the Town of Richmond, and to the satisfaction of the Town Engineer.
2. The subdivider hereby agrees to pay promptly for all materials furnished and labor supplied or performed in connection with the aforesaid work and installations.
3. The Board hereby agrees that upon certification by the Town Engineer that the work and installations have been completed as required by the terms of this agreement, the Board will recommend to the Selectmen that the streets with said subdivision be out as town highways and that all liability of subdivider and any surety be discharged, after the expiration of six months from the date when all such streets have been accepted.

TOWN OF RICHMOND
PLANNING BOARD

SURETY BOND FOR COMPLETION OF SUBDIVISION IMPROVEMENTS

Know all men by these presents:

That we, _____ of _____ (hereinafter call the "Principal", as Principal, and _____ of _____ (hereinafter call the "Surety") as Surety, are held and firmly bound unto the Town of Richmond, as Obligee, in the sum of _____ Dollars lawful money of the United States of American, for the payment of which, well and truly made to the Obligee, we bind ourselves, our heirs, representatives, successors and assigns, jointly and severally, firmly by these presents.

Signed, sealed and delivered this _____ day of _____, Year _____

THE CONDITION OF THIS OBLIGATION IS SUCH THAT:

WHEREAS, The Principal has applied to the Planning Board (hereinafter called the Board) for approval of a certain plan for the subdivision of land in the Town of Richmond, which plan is shown on a map entitled "_____" prepared by _____ and dated _____; and

WHEREAS, the principal has agreed to complete within one year from the date hereof, or such longer period as the Board may approve in writing, certain work and installations required by the Board, (as more fully appears from the files of the Board relating to the Principal's applications, which files are hereby incorporated herein by reference and made a part here of), hereinafter called the "work", in accordance with the subdivision regulations, and road construction regulations of the obligee and to the satisfaction of the Town Engineer, and to pay promptly for all materials furnished and labor supplied or performed in connection with said "work", and

WHEREAS, the Board has approved said plan on condition that the principal enter into a bond with the Town in the amount of \$_____ calculated upon the basis indicated on the statement attached hereto, with surety acceptable to the Selectmen, securing to the obligee the performance of said agreement and the actual completion of said "work" as aforesaid.

NOW THEREFORE, if the principal performs said agreement and completes said "work" on or before _____, Year _____, or within such longer period as the Board may approve in writing, this obligation shall be null and void, otherwise it shall remain and be in full force and effect and the Town may complete the "Work" (either itself or by contract with another) and shall be completely reimbursed for the cost thereof by the surety, and, for such purpose, consent to enter upon the property of the principal is hereby given; such reimbursement shall include, without limitation, all court costs and attorneys' fees connected with said completion or with successful efforts or litigation to recover on this bond;

PROVIDED, the liability of the Principal and Surety under the terms of this bond shall not exceed the amount thereof and

Appendix 6

SURETY BOND FOR COMPLETION OF SUBDIVISION IMPROVEMENTS

PROVIDED, that any alteration or change in said “Work” which may be permitted or approved by the Board or the giving by the obligee of any extension of time for the completion of the “work” or any other forbearance on the part of either the obligee or the principal one to the other, shall not in any way release the principal and the surety, or either of them, their representative, heirs, executors, administrators, successors or assigns from liability hereunder, notice to the Surety of any alterations, extension or forbearance being hereby specifically and absolutely waived.
